info@picturehangingsystems.com.au

Product description

The Locator Minirail system is the thinnest picture hanging system in the world. The rail which is available in white or clear anodised aluminium is only 16mm in height and is suited to blend in to a stylish, minimal interior.

It's very easy to use and hides its specially developed fixings within the rail to give a smooth discreet finish.

Applications

Due to the rails size, the Locator Minirail is very inconspicuous and designed specifically to be installed tight up underneath a cornice but due to its size is perfect when used as a 'stand-alone' picture rail (further down the wall).

Features

- Aluminium rail
- Dimensions: 9mm (D) x 16mm (H)
- Capable of carrying loads of up to 25kgs per lineal meter
- Available in white or silver finish
