Product description

Springlock security fixings are a world renowned system. The bridge is fixed to the back of the picture and fits over a wall-fixed screw-head, the lock slides into the bridge, behind the screw-head to lock the picture to a wall.

The system can be used with a Springlock on either side of a picture frame, (recommended for heavy pictures) or by using the Topslots on either side at the top of the frame only one bridge and lock is used, centered on the bottom.

Applications

The system has been designed to be completely hidden from sight when locked so as not to detract from the picture so is ideal for any situation where security is needed.

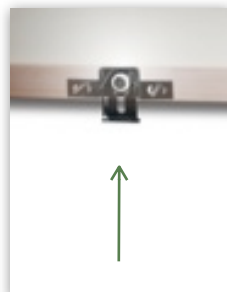

Features

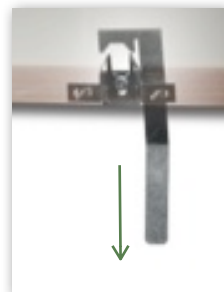

- Steel security fixings
- 2 or 3 points of fixing
- Capable of carrying loads of up to 25kgs per lineal meter
- Push lock with key to unlock

Fix in each corner slot over the wall fixing and slide to one side

Push to lock the bottom over a third wall fixing

Use key to unlock
